

ETL Fiber Distribution Point

(Pedestal)

Description:

The Fiber Distribution Point provides everything necessary to manage distribution fibers for an outside plant FTTx application on the street. The Fiber Distribution Point can accommodate fiber optic splitter inside of the plastic cover. It protects the splicing point from outside environment.

The design and layout of the cable guides promote an efficient and ordered positioning of the cable with main body. Placement of the incoming cables allows convenient access for installation, maintenance and subsequent termination of additional secondary cable. All components of the Distribution Point will be of high quality design, workmanship and finish.

FDP for pedestal application

Features

- Intelligent design.
- Simple and clearly arranged cable management.
- Outdoor Pedestal.

Applications

- Outdoor installation
- On the ground
- Distribution point for subscriber
- FTTH (Fiber To The Home)
- Data communications

Features:

1. Material: HDPE, wet-proof, water-proof, dust-proof, anti-aging, protection level up to IP65.
2. Working temperature: -10 to 80 Degree,
3. Main technical data sheet
 - Insertion loss: $\leq 0.2\text{dB}$
 - UPC return loss: $\geq 50\text{dB}$
 - APC return loss: $\geq 60\text{dB}$
 - Life of insertion and extraction: > 1000 times

Specification:

Parameter	Unit	Spec.	Remarks
Dimension	mm	Diameter 289mm, height 970mm	
Cable entry (In/Out)	ea	1/1	
Input / Output Dia.	mm	20mm	
Key Lock	ea	1/1	
Termination Enclosure	ea	1/1	Optional
Installation type	Lot	Pedestal	On the Ground
